

wacom® Cintiq Pro

Why Wacom Cintiq Pro 27?

A quick guide on how to answer some of your customer's questions about choosing a Wacom Cintiq Pro 27.

Why's it better than pen displays from other brands?

Improved workflow efficiency

- Touch/Multi-touch/Selective Touch intuitive controls
- On-screen Radial menu/shortcuts
- Grid panels
- Pen & touch gestures
- Keyboard attachment

High-end studio-quality color performance

- Optimized color profile
- 99% Adobe RGB for print
- 98% DCI-P3 for film
- HDR support for HDR content
- 10-bit color depth

New pen experience

- 3rd Generation Wacom Pro Pen technology
- Customizable pen for ergonomics, preferences and options (grips, side switches, weight, weight balance)
- New pen tip shape
- Own Pen ID
- Very low and adjustable activation force to capture fine stroke

Fast screen & near-zero pen latency

- 120Hz refresh rate greatly reduces pen latency
- 10 ms response time
- 4K resolution

What's the difference between this and previous versions?

Best Wacom display ever

- Studio-quality display that supports moving images, photos & print to industry standards

Improved design

- Merges functionality with comfort, e.g. Wacom Extension Table)
- New features to improve workflow, e.g. more ergonomic grip-type ExpressKeys™

More efficient use of space

- Larger canvas to draw on, but takes up less desk space
- Significantly reduced footprint (even less than Wacom Cintiq Pro 24)

Sustainability

- FCS certified paper for packaging material
- Use of recycled and sustainable materials wherever possible (product design, structure)
- Design structure for easy repairing
- Most sustainable Cintiq Pro ever

Ergonomics

Stand

- Stand (sold separately) can be tilted and rotated
- Compatible with VESA 100x100mm mount
- VESA mount compatible with third-party monitor arms and mounts

Enhanced workflow

- Pen & touch features
- Intuitive ExpressKeys™
- New driver for user-friendly UI design

Desk integration

- 1/4" screw holes for attaching third-party accessories (camera for live streams, microphone, LED light and more)
- Extension Table (sold separately) stores items such as keyboards, phones and notebooks
- New center of your interactive studio
